Background in brief

Dudley Perera's project has been underway since 1988. The main aim of the project is to monitor local sea turtle activity and conserve the local nesting sites. We aim to make the public more aware of how endangered these beautiful creatures are and just how important it is to help protect them before it is too late. we are implementing Logistics division to their web system.

Requirements

- The system should be readily accessible from remote locations.
- Interface design should be responsive.
- The logistics division processes should be clearly computerized and could be able to monitor.
- Proper access levels should be implemented.
- File handling and file archive should be maintained.
- E-mails and alerts to be managed.
- News should be notified upon login.

Schedule

The phase 1 of the project is scheduled to finish in 1 month of time. The testing & implementation period may vary according to the feedback of the client.
